Experience Is Everything

“Divolight” brand is the house brand of Divolight Group Int. The group was established in 2004, specializes in two main areas of expertise - **LED lighting** and **energy saving** solutions. Divolight Group business strategy is to provide a full lighting and energy saving solution.

Designed To Perfection

A major directions of our business operation is **architectural** and **decorative illumination** projects. An in-house design agency offers design and planning services for such projects. Combined with professional equipment, the options are Endless and you can let your imagination go wild.

Wide Range Solutions

Over the years, the group successfully added many **LED Lighting** solutions to its range. Today we can offer a solution for almost every demand of the market: Street lighting, industrial lighting, office lighting, home lighting, facades lighting, commercial lighting, sports lighting ETC. Every solution comes with an optional **lighting control system**. The products offered by Divolight group are certified by the European, American, Russian and Israeli markets.

Professionally International

Divolight Group Int. Headquarters has moved to Israel in 2010, and during a period of 6 years we opened agencies in: United States, Kazakhstan, Russia, Spain and England. Divolight QA center is located in Hong Kong and its qualified team oversee the manufacturing of every product made in over 75 factories that earned the status “**Divolight partner**”.

Our vision is to be an elite brand in the lighting industry, to escort our client to a maximus energy saving result using our vast experience and knowledge. Our commitment is to provide our client with the most advanced and efficient solutions, without compromising on quality and service level.

Why LED?

Economic Growth

Environment Friendly

Positive Effect

Professionalism

We must fulfill the high standards that lead our founders companies to great success.

Integrity

We never finish a project until we deliver 100% of what we promised. The protocols that we use in our solution will be always universal so the client is not obligated to work with us at any time.

Innovation

We will always prefer to use the newest components in our products to get super-efficient results.

Best value for you money

We believe that a good solution should be fairly priced. We will always pursuit that our products will be lower priced then competitors' products with the same technical characteristics.

Environment

As a company that sales Green products, we owe it to our self to be the greenest we can in every aspect of our lives.

Personal and focused relations

We believe in customizing a perfect solution for each client.

One Stop Solution

A main strategy of all the companies in the group, to cover all clients needs in one place.

Professionalism & Reliability

Divolight Int. established in 2004 with a goal of producing quality LED based lighting solutions. Our expert are qualified in characterizing an optimal lighting solution to match the client's needs, both cost and design wise.

End To End Solutions

Divolight Group business strategy is to provide a full lighting and energy saving solution. Our clients can trust us with planning, manufacturing and installing all products needed for the project. Our goal is to keep the client calm from the beginning of the project till the end.

Quality Without Compromise

All of our lighting products are imported directly and exclusively from Divolight Int. and are being tested by our QA department to match our high quality standards. The ability to make a direct import is insuring the best quality supervision and reduces cost price.

Understanding customer needs

Divolight Israel advisers characterize customer's needs and fit the optimal lighting solution, Both ROI and design wise. One of the characterization steps is a computerized lighting simulation which gives a true assessment of the result in the end of the project.

Project escorting

Divolight specialists accompany all customers from planning their projects and installation. The company transfer all required technology including installation methodology to local employees.

Energy efficiency survey and ROI report

Divolight engineers perform Energy efficiency surveys with advanced equipment to receive the exact data. Afterwards a comparison is made between the existing and the LED lighting solutions. Finally the costumer will receive a table with the exact numbers of energy and maintenance savings and the ROI of the suggested project.

Import LED lighting fixtures

Divolight Israel is the exclusive importer of LED products by Divolight. Thanks to the direct import the cost decreases and the ability to supervise on the products quality raises. All our products are under high QA performance and provide extraordinary durability.

Installation

Divolight Israel has several official subcontractors who performs the installation. Divolight carefully select her subcontractors and putting them through periodic training by Divolight engineers. Divolight take full responsibility on her subcontractors work.

Business models

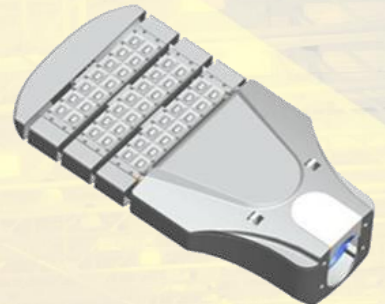

Divolight Israel suggest several business models. One payment purchase will give high annual revenue. Multiple payments following the ROI – being energy efficient for free. Divolight will pay for the project and the costumer and Divolight will split the saving- the costumer saves money from day one.
